

ATTENTION!

On Friday May 20th the application of a fish toxicant (Rotenone) will take place on the Little Calumet River, for a 2 mile stretch down stream of the T.J. O'Brien Lock and Dam

BETWEEN MAY 20-27, 2010 THE PUBLIC SHOULD:

- NOT Swim or recreate in the Little Calumet River
- NOT Fish in the Little Calumet River
- NOT Eat fish found in the Little Calumet River

Rotenone is toxic to aquatic gill breathing organisms and not known to be harmful to humans or most other animals

Your drinking water is safe!

Members of communities near the treatment area should refrain from using the Little Calumet River between May 20-27.
